

## Building the Next Generation of Neurologists

Bush Veterinary Neurology Service's dedication to the advancement of veterinary neurology and neurosurgery is demonstrated by our commitment to teach and mentor the next generation of leaders and pioneers. In two short years, our teaching program has grown substantially, adding to a very small and select pool of knowledge. We have carefully chosen these individuals to become a part of our ever-growing family.

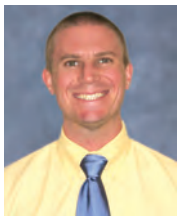

Dr. Martin Young, BVNS' first resident, passed his medicine qualifier in July and is working towards his neurology certifier exam in June 2012.

Dr. Devon Hague has moved into her second year of residency, with training in neurology and neurosurgery.

Dr. Daniel Cuff is our newest resident and has begun the first year of his residency.

Dr. Casey Neary joined our team as our new neurology intern.

We look forward to witnessing their contributions to the field of veterinary neurology.

## My How Time Flies

It has been just over 21 months since we first launched the BVNS Bulletin. Initially, our goal was to do a better job of keeping in touch, sharing the latest neurology developments and of course introducing new team members, enhanced service offerings like clinical trials, updates from our residency program, new locations and celebrating an occasional special milestone like the birth of my second son earlier this year.

We have received great feedback on the content of our newsletter and the accompanying photos for which we thank you. Going forward, we want to be sure we are including items that are of most importance to you – whether it's a Q&A section, a tip of the month or more in-depth coverage of a particular topic. Please send any comments or suggestions to our Director of Operations, Christine Stafford, at [cstafford@bvns.net](mailto:cstafford@bvns.net). We look forward to continuing to serve you and your patients in Leesburg and Springfield, VA.

Thus, it is with great appreciation for our partnership that we present the BVNS Bulletin, Issue 4. Enjoy!

*W. Bush*

**William Bush, VMD, DACVIM (Neurology)**  
Neurology/Neurosurgeon

**Joli Jarboe, DVM, DACVIM (Neurology)**  
Neurology/Neurosurgeon

**Deena Tiches, DVM, DACVIM (Neurology)**

Neurology Resident

**Devon Hague, DVM**  
Neurology Resident

**Daniel Cuff, DVM**  
Neurology Resident

**Casey Neary, DVM**  
Neurology Intern

## Veterinary Neurology Times Two

In May 2010, we opened our second full-service location at the Regional Veterinary Referral Center in Springfield, Virginia. We are open Monday through Thursday for neurology referrals and advanced imaging. Deena Tiches, DVM, DACVIM (Neurology) is available on a full-time basis and Drs. Bush, Jarboe, and Brewer will also see cases here on a rotating basis.

All services offered at our Leesburg location are also available in Springfield, including **onsite MRI** capabilities.

**Leesburg** 165 Fort Evans Road NE #103  
Leesburg, VA 20176  
Located in The LifeCentre  
P: 703.669.2829 | F: 703.669.2870

**Springfield** 6651 Backlick Road  
Springfield, VA 22150  
Located in the Regional  
Veterinary Referral Center  
P: 703.451.3709 | F: 703.563.9681

After Hours: 301.471.4905 | [www.bvns.net](http://www.bvns.net)

## Welcome to David Brewer, DVM DACVIM (Neurology)

We are proud to introduce you to Dr. David Brewer, the latest board-certified neurologist/neurosurgeon to join our team. Adding more team members supports our commitment to 24/7 availability and provides you with access to immediate care for your patients at any time. We are happy to have him as part of our team in both Leesburg and Springfield.

## A Complete Set of Diagnostic Tools

To ensure comprehensive neurology care, both of our locations have onsite MRI and CT capabilities. The neurology team at Bush Advanced Veterinary Imaging is skilled at helping you select which imaging modality is best for your patient and whether consultation with a specialist is necessary.

You can reach our team of neurology specialists by calling **703.669.2829** and our skilled team will recommend the most appropriate diagnostic tool for your patient.
